Proposing a course to serve as an elective in the data science minor

Please fill in this form and include it in your correspondence with a member of the administrative committee.

1. What is the title, catalog number, and department of the course being proposed? If this is a new course, please indicate that.

2. If this is an existing course, explain what types of students currently take the class (i.e., from which majors and whether they are freshmen, sophomores, juniors or seniors), the current enrollment numbers, and expected enrollment numbers.

3. Does the course have any prerequisites? If so, please list them.

4. Please explain how the proposed course fits into the data science minor based on the Guidelines.
5. If the course includes domain specific practical work with datasets, please explain the type of data being used and the type of software or programming language being used to analyze them.
